

Custom Fabrication

Trust the specialists at Summit Industries.

Summit Industries provides precise assembly to your specifications, including factory modifications. Count on our technicians for quality custom work, quick turnaround times, and emergency service when you need it.

Specialists in Custom Motor Controls

- Combination Starters
- Relay Panels
- Motor Starters
- Lighting Control Cabinets

Skilled in Custom Metal Fabrications

- Computer protection distribution panels
- Bussed gutters for electrical distribution
- Electronic rack assemblies (most NEMA types)
- Lighting panels and panel boards
- Electrical distribution junction boxes
- Custom enclosures (most NEMA types)
- Custom copper bus bars

Additional Services

- Variable frequency drives
- Programmable logic controls for various PLC applications
- Custom name plate fabrication

Using UL Listed Products Is Not Enough...

While components may be UL listed, how they are installed and integrated within the control panel can affect compliance with safety requirements. Summit Industries can build your control panels to UL508A requirements and has the certification your project requires.

Our UL508A certification, earned in 1998, covers:

- panels designed for general industrial use
- assemblies that include motor controllers, overload relays, fused disconnect switches and more
- assemblies with open or enclosed construction
