

SUMMIT
LOCKBOX®

Safe, Secure, Mobile Storage

Simplify your supply chain. Maximize your productivity.

By bringing material directly to your jobsite, Summit Lockbox® cuts down on wasted time and keeps your projects on time and on budget.

Manage your onsite inventory with:

- **Supply Chain Efficiency** – Reduce ordering, receiving and billing frequency, all while eliminating storage costs and non-value added labor costs.
- **Inventory Flexibility** – Highly configurable to meet your unique storage needs. Supports wire reels, shelving, or a combination of both.
- **Customized Inventory Management** – Easily manage material, track usage, and stock levels using Summit Snapstock® with VMI and CMI capabilities.
- **Regular Replenishment** – Avoid material shortages with delivery directly to your jobsite or work area.
- **Secure, Mobile Storage** – All-steel, lockable construction featuring heavy duty casters and forklift guides that stand up to any environment.

Summit Lockbox® helps:

Reduce Labor Costs

Increase Efficiency

Eliminate Loss and Theft

Lower Storage Expense

Technical Specifications

Summit Lockbox® can be configured for wire reel storage, small parts storage or a combination of both. The sturdy adjustable shelving and spool posts can be arranged in a variety of setups to best suit your needs.

These all-steel carts are carefully designed and built with construction materials and packaging in mind, ensuring maximum storage space.

The flexibility of Summit Lockbox® makes it simple to create your ideal onsite storage solution.
