

In-Stock Pow-R-Xpress Components

Right Panel. Right Configuration. Right Now.

Waiting on panels, reworking layouts, and last-minute changes slow you down. Eaton Pow-R-Xpress panelboards eliminate those delays with certified, preconfigured solutions kitted to your job specifications. We simplify enclosure, power, and protection selection so panels arrive job ready and projects stay on schedule.

Key configuration options

- **Main Lug or Main Breaker** – Supports main lug only or main breaker configurations up to 600A.
- **Simplified Coordination** – Kitted panelboards streamline ordering and coordination, making it easier to manage single panels or repeat builds across a project.
- **Service Entrance Options** – Configured based on how power enters and flows through the system.
- **Distribution Flexibility** – Branch and sub-feed breaker options support downstream panels and grouped loads.
- **Indoor and Outdoor Use** – NEMA 1 and vented NEMA 3R enclosure options support a wide range of environments and applications.
